AI-POWERED CUSTOMER INTELLIGENCE PLATFORM PROPOSAL

Submitted To

Insight Retail Private Limited

Chennai, Tamil Nadu

Submitted By

StratVision Analytics Private Limited

Executive Summary

StratVision Analytics Private Limited is pleased to present this proposal for the design, development, and deployment of an AI-Powered Customer Intelligence Platform for Insight Retail Private Limited.

The retail industry is undergoing significant transformation driven by changing customer expectations, digital engagement channels, and increased competition. Organizations that leverage predictive analytics and artificial intelligence are better positioned to improve customer retention, increase revenue, and optimize marketing investments.

This proposal outlines a strategic transformation initiative designed to help Insight Retail move beyond traditional reporting and adopt advanced analytics capabilities that support proactive business decision-making.

The proposed platform will provide predictive insights, customer behavior intelligence, churn forecasting, and personalized recommendation capabilities that can drive measurable business outcomes.

Business Objectives

The proposed engagement seeks to achieve the following objectives:

- Improve customer retention rates
- Increase customer lifetime value
- Improve marketing effectiveness
- Reduce customer churn
- Enable personalized customer engagement
- Support predictive decision-making
- Improve revenue growth opportunities

Proposed Solution

StratVision recommends implementation of an integrated Customer Intelligence Platform consisting of the following components.

Customer 360 Platform

A centralized customer intelligence repository designed to consolidate customer information across multiple business systems.

The platform will provide a unified customer view to support strategic and operational decision-making.

Customer Churn Prediction Engine

The solution shall utilize machine learning models to identify customers who may be at risk of discontinuing engagement with the business.

This capability enables proactive customer retention initiatives and targeted interventions.

Personalized Recommendation Engine

Artificial intelligence models shall be used to generate customer-specific product recommendations based on purchasing behavior, customer preferences, and historical interactions.

Executive Intelligence Dashboard

The executive dashboard shall provide:

- Customer acquisition trends

- Customer retention metrics
- Revenue forecasting
- Churn prediction indicators
- Product recommendation performance
- Marketing effectiveness insights

Implementation Methodology

The project shall be delivered through a structured six-phase approach.

Phase 1 – Strategy and Discovery

- Business stakeholder workshops
- Data maturity assessment
- Current-state analysis
- Transformation roadmap development

Phase 2 – Data Engineering Foundation

- Data integration activities
- Data quality assessment
- Data model preparation
- Data architecture setup

Phase 3 – AI Model Development

- Customer segmentation models
- Churn prediction models
- Recommendation engine development
- Model validation and testing

Phase 4 – Platform Development

- Dashboard creation
- User interface development
- Reporting configuration

- Workflow integration

Phase 5 – User Acceptance Testing

- Business validation
- Performance testing
- User acceptance sign-off

Phase 6 – Deployment and Change Management

- Production deployment
- User enablement sessions
- Knowledge transfer
- Hypercare support

Project Timeline

The estimated duration of the engagement is **8 months**.

Phase	Duration
Strategy & Discovery	4 Weeks
Data Engineering	8 Weeks
AI Development	10 Weeks
Platform Development	6 Weeks
User Testing	2 Weeks
Deployment & Change Management	4 Weeks

Expected Business Benefits

Based on our experience delivering similar AI transformation programs, the proposed solution may provide:

- Improved customer retention
- Increased cross-sell and upsell opportunities
- Higher customer lifetime value
- Improved marketing return on investment
- Improved customer engagement

- Better forecasting accuracy
- Increased revenue growth opportunities

The proposed initiative is expected to generate an estimated return on investment of approximately **260% over a three-year period**, subject to adoption, market conditions, and implementation success.

Commercial Proposal

The professional fees associated with the proposed engagement are as follows:

Description	Amount (INR)
Strategy Consulting Services	₹12,00,000
Data Engineering Services	₹8,00,000
AI Model Development	₹10,00,000
Platform Development	₹6,00,000
Change Management & Training	₹2,00,000
Total Project Cost	₹38,00,000

Applicable taxes shall be charged extra as per prevailing regulations.

Payment Schedule

Milestone	Payment
Project Initiation	20%
Strategy Completion	20%
AI Development Completion	25%
User Acceptance Testing	20%
Production Go-Live	15%

Risks and Considerations

Successful implementation of this initiative depends upon:

- Availability of high-quality customer data
- Business stakeholder participation
- Adoption of new analytical processes
- Availability of required technology infrastructure

- Organizational readiness for AI-driven decision-making

Proposal Validity

This proposal shall remain valid for **45 days** from the date of issuance.

Acceptance

We appreciate the opportunity to submit this proposal and look forward to supporting Insight Retail Private Limited on its AI transformation journey.
